

# CMHC Green Home

Helping to Make Energy-Efficient Housing Choices More Affordable

CMHC Mortgage Loan Insurance helps lenders offer borrowers more affordable financing choices when purchasing an energy-efficient home or purchasing an existing home and making energy-efficient improvements.

## Features

- A 2-level premium refund structure that recognizes different levels of energy efficiency:
  - Level 1: 15% of the total premium paid
  - Level 2: 25% of the total premium paid
- Available for the construction or purchase of an energy-efficient home or the purchase of an existing home where energy-efficient improvements are being made and CMHC-insured financing is being used.
- Most new homes built under a CMHC-eligible energy-efficient building standard automatically qualify for a premium refund. For all other homes, eligibility will be assessed using Natural Resources Canada's (NRCAN) EnerGuide Rating System (ERS), either the 0-100 scale or the gigajoule scale.
- Premium refund applications are accepted from the borrower within 2 years of the closing date of the mortgage.

## Benefits of CMHC Green Home
